EDUCATION

Bachelor of Industrial Technology in Electronics Technology (Computer)

King Mongkut's University of Technology North Bangkok

2024 – Present GPAX 3.00

High Vocational Certificate in Information Technology

Pongsawadi Technological College

2021 – 2023 GPAX 3.86

SKILLS

Frontend Development

React, Next.js, Tailwind CSS, HTML5, CSS3

Backend & APIs

Node.js, FastAPI (Python), JSON

Programming Languages

Python, C/C++, Java, JavaScript

Tools & Platforms

Git/GitHub, Antigravity, Google Colab, Postman

PROFILE

Computer Electronics student focusing on web technologies. I build applications using React and Node.js, with a strong emphasis on Git workflow and API testing. Seeking an internship to gain hands-on experience, contribute to real-world projects, and elevate my programming standards.

PROJECT EXPERIENCE

EduGen AI-Powered Quiz & Summary Generator

Stack: Next.js, React, FastAPI, Python, Tailwind CSS

2025 - Present

- Developed a full-stack web application that generates interactive quizzes and summaries from uploaded documents using Generative AI
- Engineered a high-performance backend with FastAPI to handle document processing and prompt engineering logic, serving data to the client via RESTful API.
- Built a dynamic frontend using Next.js and React, implementing complex state management for real-time quiz interaction and history persistence.

IoT Smart Gas Monitoring System

Stack: ESP32, C++ , LINE Notify API, MQ2 Sensor

2022 - 2023

- Designed and built an IoT safety device utilizing NodeMCU and MQ2 sensors to detect hazardous gas and smoke levels in real-time.
- Integrated RESTful API with LINE Notify to push instant alerts to the user's smartphone via WiFi, demonstrating proficiency in HTTP requests and third-party API connectivity.
- Programmed the microcontroller using C++ to process sensor data, display status on an LCD screen, and trigger an auditory alarm (Buzzer) for immediate local warning.
